

TOP 10 REASONS FOR EHR Data Migration

No.

1

ELIMINATE LEGACY SYSTEMS

Data migration combined with VitalCenter Online Archival eliminates the need for legacy clinical system(s)

No.

2

LOWER COSTS

Reduce licensing fees and resources required for maintaining multiple EHRs

No.

3

ONE SYSTEM FOR ALL

Increase productivity and efficiency by using one central system as opposed to multiple, disparate systems

No.

4

MAXIMIZE PRODUCTIVITY

Access all historical data including patient safety, clinical decision support, HMP, DDI, Allergy, etc. from a single source for enhanced patient visit efficiency

No.

5

STRENGTHEN COMPLIANCE

Satisfy state and federal legal requirements, and maintain compliant record retention

No.

6

PRESCRIBE ELECTRONICALLY

Increase patient safety and prescription accuracy, save time, and reduce healthcare costs

No.

7

ENHANCE OPERATIONAL EFFICIENCY

Streamline patient encounters, reduce exam room delays, and increase patient satisfaction

No.

8

REDUCE HUMAN ERROR

Avoid data redundancy and improve data integrity

No.

9

A GREENER SOLUTION

With data all in one place, there's less paper to print and scan for patient visits

No.

10

MEET QUALITY MEASURES

Enhance regulatory reporting with programs including PQRS and PCMH
